

AMNESTY INTEREST RATES

Interest for Amnesty returns is simple interest.

Note: You must use the Amnesty Interest Factor to calculate the interest due on the taxes. These factors have been established to reflect the allowed statutory reduction of interest. If you do not use this factor, you may incorrectly pay your amnesty obligation and jeopardize your eligibility for amnesty.

You will need to add the interest amount to your tax due when calculating your total liability for Amnesty.

Use the calculator below to assist you in determining your interest due and total liability. Find the Tax Year for your Amnesty return, enter the amount of tax liability due in the corresponding Tax Due column and press enter.

Tax Year	Tax Due	Interest	Total Liability
